## About Me

I am Ravindu Perera, a fresh graduate with a BSc. in Information Technology from SLIIT. I am genuinely obsessed with interfaces, UI design, and UX research, and I recently completed an internship as a UI/UX Engineer, where I gained hands on experience designing user friendly digital products. Through various group projects and individual research, I have also built a solid foundation in web and full-stack development. I am a quick learner and a strong team player, eager to bring my passion for design and problem solving to a team where I can grow and make a real impact.

## Work Experiences

**UI/UX Engineer** **Internship**
Creavint | LinkedIn

Completed an internship as a UI/UX Engineer at Creavint, where I gained hands on experience working on real world projects and learned how teams collaborate throughout different stages of a project. My role involved turning ideas into user friendly designs while maintaining a strong user experience. During the internship, I improved my problem solving, communication, and teamwork skills by adapting to project changes and working closely with developers and designers. I also supported the marketing team by creating graphic design content for promotional and social media materials.

- *React* | *React Native* | *Typescript* | *Figma* | *Canva* | *Affinity*

**Shilpa Mobile Learning Platform** **Final Year Research**
Research Paper - IEEE Explore | Research Site

SHILPA (Supportive Holistic Inclusive Learning Platform Application) is a research project focused on developing an accessible mobile learning platform for children with disabilities. The platform includes features such as sign language support, Braille document generation, eye-tracking input, and simplified user interfaces to improve access to digital education through inclusive and user-centered design.

- *Flutter* | Node | *Google ML Kit* | *Tensorflow* | *MongoDB*

**Vehicle Rental App** **Individual Project**
Documents and Links

This mobile application is designed to help tourists visiting Sri Lanka easily find and rent vehicles during their stay. It provides a simple, user-friendly interface where users can browse available cars, vans, bikes, and tuk-tuks listed by local owners. It features such as advanced search filters, vehicle details, location previews, and directions.

- *React Native* | *Figma*

**Uber Shopping (Supermarket Delivery System)** **Year 2 Semester 2 Project**
Prototype | GIT Repo

Using MERN Stack

- *MongoDB* | *Express* | *React Js* | *Node Js* | *Figma*
  Designed the Prototype of the project UI
  Implemented the Order Management part of the system

**UX Research (Redesigned Daily Mirror Online News Web Page)** **Year 3 Semester 1 Project**
Project Link | My Contribution

Redesigned the UI of a web page by addressing usability issues and improving user experience. Gained valuable skills in UX research and UI design throughout the project.

- *Figma*

**Bubble (Real Estate Website)** **Individual project**
Prototype

A clean, modern real estate interface that helps users search, explore, and connect with property listings using intuitive navigation and vibrant blue accents. This project helped me to develop animation skills in Figma, including hover effects and page transitions.

- *Figma*

**Travel App (Mobile UI)** **Individual project**
Prototype

A minimalist travel companion app that helps users discover dream destinations and navigate seamlessly, featuring an elegant blue gradient theme and friendly visuals. Designed following general iOS design principles, it incorporates a refined glass effect in the header and bottom navigation bar for a modern, immersive look.
