About Me

I am an undergraduate at SLIIT pursuing a BSc in Information Technology. Through various group projects and individual research, I have gained substantial experience in web development and full-stack development technologies. Additionally, I have developed skills in UI design. I am proficient in writing clean and scalable code, a quick learner, and a strong team player. I am eager to continue growing my skills and actively seek opportunities to contribute and make a significant impact in the field of IT.

Work Experiences

UI/UX Engineer

[Creavint](#) | [LinkedIn](#)

Internship

Completed an internship as a UI/UX Engineer at Creavint, where I gained hands on experience working on real world projects and learned how teams collaborate throughout different stages of a project. My role involved turning ideas into user friendly designs while maintaining a strong user experience. During the internship, I improved my problem solving, communication, and teamwork skills by adapting to project changes and working closely with developers and designers. I also supported the marketing team by creating graphic design content for promotional and social media materials.

Shilpa Mobile Learning Platform

[Research Paper - IEEE Explore](#) | [Research Site](#)

Final Year Research

SHILPA (Supportive Holistic Inclusive Learning Platform Application) is a research project focused on developing an accessible mobile learning platform for children with disabilities. The platform includes features such as sign language support, Braille document generation, eye-tracking input, and simplified user interfaces to improve access to digital education through inclusive and user-centered design.

Vehicle Rental App

[Documents and Links](#)

Individual Project

This mobile application is designed to help tourists visiting Sri Lanka easily find and rent vehicles during their stay. It provides a simple, user-friendly interface where users can browse available cars, vans, bikes, and tuk-tuks listed by local owners. With features such as advanced search filters, vehicle details, location previews, and directions.

Designed the Prototype of the project UI
Implemented the Order Management part of the system

UX Research (Redesigned Daily Mirror Online News Web Page)
[Project Link](#) | [My Contribution](#)

Year 3 Semester 1 Project

Redesigned the UI of a web page by addressing usability issues and improving user experience. Gained valuable skills in UX research and UI design throughout the project.

Bubble (Real Estate Website)
[Prototype](#)

Individual project

A clean, modern real estate interface that helps users search, explore, and connect with property listings using intuitive navigation and vibrant blue accents. This project helped me to develop animation skills in Figma, including hover effects and page transitions.

Travel App (Mobile UI)
[Prototype](#)

Individual project

A minimalist travel companion app that helps users discover dream destinations and navigate seamlessly, featuring an elegant blue gradient theme and friendly visuals. Designed following general iOS design principles, it incorporates a refined glass effect in the header and bottom navigation bar for a modern, immersive look.
